

Pensions Integration

Seamless Integration with your Pension provider

Auto enrolment functionality is available as standard in Opera 3 Payroll. Employee Assessment, Auto enrolment, staging date and all statutory settings as defined by The Pension Regulator as standard. Opera 3 offers further enrolment duties with integration to Nest and NOW: pensions. With many alternative options available, we have worked closely with NOW: pensions to provide enhanced integration and other providers to offer integration with Opera 3 Payroll.

Opera 3 Payroll has standard integration with NOW: Pensions. However, in addition to creating a file containing details of all employees who are being auto enrolled into a NOW: Pension scheme the enhanced integration solution allows you to import a file from the NOW: Pensions online portal and view differences between the Opera 3 Payroll and the NOW: Pensions portal.

With integration to The People's Pension, you can create a file containing details of employees who are being auto enrolled, or have been enrolled, in The Peoples Pension Scheme. A report is produced before the file is created, which can be used for audit purposes, and the contribution file is produced in the correct format for upload to the Peoples Pension portal. The file contains contribution details for enrolled employees as well as details of newly enrolled employees and employees that have opted out or left.

Integration with one of the UK's top pension providers at the click of a button, eliminating the need to manually collate data. Create a report detailing pension contributions and employees that have been auto enrolled, opted out or left then immediately create a file containing all the necessary data ready to be uploaded to Scottish Widows.

Key Features

Integrated within the Opera 3 Payroll & HR Application

Simple and easy-to-use processes streamline submission of information to pension providers

Simplified communication between employer and pension provider

The information submitted is relevant and accurate

Ability to include employee email address with submitted files

Reduces costs by saving you a considerable amount of time
