

“PODFather allowed our business to take on 23% more business last year with no increase in resources required.”

PODFather

Intuitive workflow management & fleet optimisation for the distribution industry

Our software can help you streamline your business processes

Our cloud-based logistics and workflow management software will enable you to handle a range of core business processes through one easy to use platform.

Replacing paper-based systems speeds the flow of data through your organisation.

It leads to better use of resources, faster invoicing, and better customer service.

It allows your office staff to be better informed about the jobs they are managing on a daily basis, highlighting problems before they occur, making you a proactive rather than reactive organisation.

Our core system includes a number of business critical features

Route planning & optimisation

Ensure vehicle plans are cost effective, resource efficient and meet customer time window expectations.

Customer notifications

Automatically send communications, via email, text or our online portal, informing customers when your vehicle is on its way.

Proof of Delivery

Log job completion, scan barcodes, capture signatures, photographs and customer feedback. Share it with both your transport office, and the customer in real time.

Order management

Automatically upload jobs via our API or customer portal for faster processing.

Vehicle checks

Make sure all necessary vehicle checks have been carried out and logged before your vehicles leave the depot.

Vehicle tracking & driver app (Android & iOS)

Upload job notifications directly to your drivers, log all vehicle check information, track delivery progress & monitor fleet performance in real time.

Invoicing & reporting

Invoices can be processed, and payment received, faster than before. Use our reporting options to review and refine business performance.

Paul Arman,
IT Director, Bidfresh

“ We trialled the PODFather system at one of our businesses. All staff found it to be very reliable and easy to use, so it was an easy decision to commit to a full nationwide rollout. ”

Our system has been proven to

- Cut costs
- Reduce paperwork
- Minimise empty running
- Improve customer service
- Streamline processes
- Facilitate business growth

Integrating PODFather into your business

We understand how important it is for our customers to easily integrate PODFather into their business. Therefore, you can integrate our system into your existing infrastructure using web services. Jobs can be uploaded or pre-routed and PODs downloaded as soon as they are completed.

Our clients include

PODFather combines outstanding solutions and service in one package

When you deal with PODFather, you can rest assured that you are dealing with the best. We treat our customers as partners and want to help them succeed by offering solutions that not only help save money through operational efficiencies, but also help them win new business by standing out from the competition.

We have over 20 years of experience in developing, implementing and supporting workflow, optimisation and Proof of Delivery systems for hundreds of businesses running thousands of vehicles out on UK roads every day.

“ Here at PODFather we are passionate about developing, delivering and supporting optimisation solutions that make a real difference to today's distribution fleet operators. As a business we have over 20 years experience and across our current client base we are helping optimise and track over 30,000 vehicles running on UK roads every day. ”

Colin McCreddie,
Managing Director, PODFather
